

# URETHANE SEGMENTED V-GUIDES

For many years urethane V-guides have been a good solution for situations where operating conditions have created alignment or tracking problems. BeltingEdge's new Urethane Segmented V-guides have improved this original concept in the following ways:

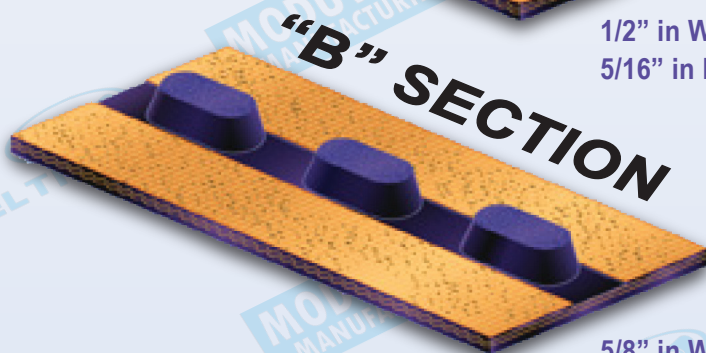

- **Flexibility makes these perfect for smaller pulleys.**
- **Extremely resistant to abrasive applications.**
- **Because the guide is segmented, it provides protection against complete guide failure.**

## **APPLICATIONS INCLUDE:**

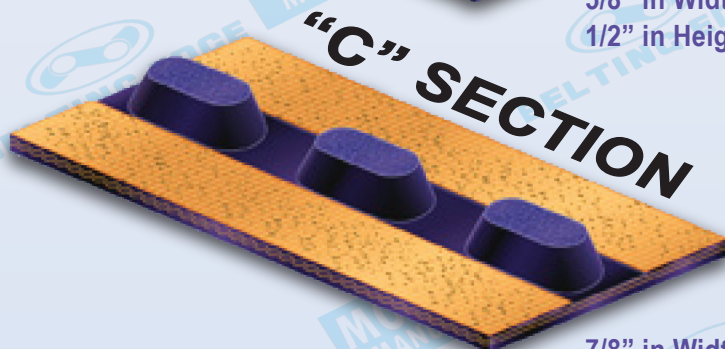

- ◆ **Automotive**  
*(Metal Stamping)*
- ◆ **Boxboard**
- ◆ **Fiberglass Plants**
- ◆ **Tile Manufacturing**
- ◆ **Building Products**
- ◆ **Cement Industry**
- ◆ **Brick Manufacturing**
